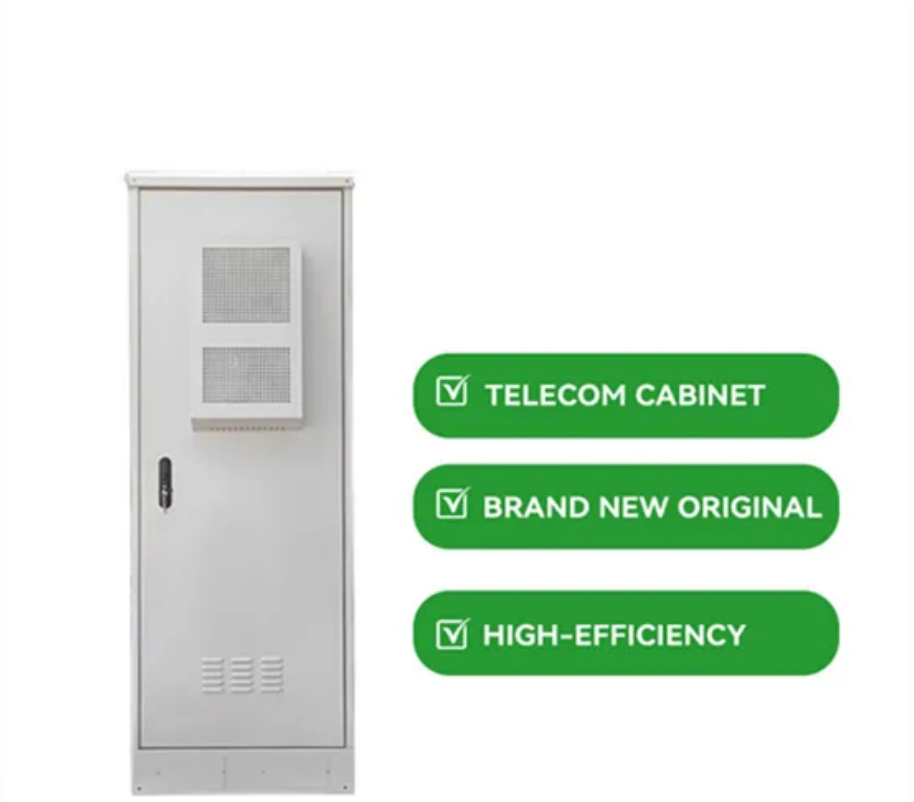
Why install photovoltaic panels even if it costs money



Overview

The pros of using solar panels include a lower carbon footprint, lower electric bills, potentially higher home value and tax credits. Federal and (depending on where you live) state incentives make installing solar panels on the roof of your house a fairly affordable, money-saving home improvement project. But new federal legislation has accelerated the expiration of the 30% tax credit for homeowner-owned solar systems, moving. Solar panels are an upfront investment that can save homeowners a significant amount of money in energy costs over the life span of the panels. “Systems could cost somewhere between $10,000 to $30,000, and then you get the tax credit off of that. Some or all of the mortgage lenders featured on our site are advertising partners of NerdWallet, but this does not influence our evaluations, lender star ratings or the order in.
