

# 2025 PV Panel Grid-Connected Electricity Price

## Overview

---

Grid-tied solar dominates the market for good reason: With 2025 system costs ranging from \$2.00 per watt installed and federal tax credits of 30% through 2032, grid-tied systems offer the fastest payback periods (6-10 years) and highest returns on investment without requiring expensive. The US solar industry installed 11.7 gigawatts direct current (GWdc) of capacity in Q3 2025, a 20% increase from Q3 2024, a 49% increase from Q2 2025, and the third largest quarter for deployment in the industry's history. So, what are we paying for when we invest in solar?

The total solar panel pricing in 2025 is not just the price of the panels alone.

## 2025 PV Panel Grid-Connected Electricity Price

---

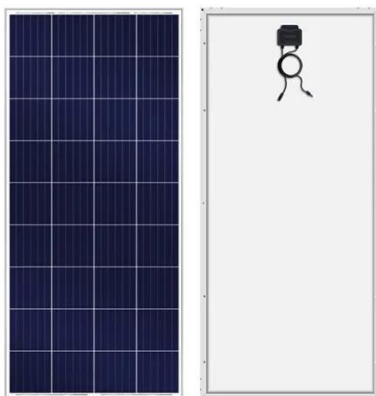

### Renewable electricity - Renewables 2025 - Analysis

Higher retail electricity prices following the energy crisis, along with strong policy support, have encouraged individuals and businesses to install solar PV systems with the aim of reducing their ...
