2025China Solar Power Generation

Overview

China added approximately 315 GW of new solar capacity in 2025, alongside about 119 GW of new wind power, setting new annual records for both technologies. By the end of the year, total installed power generation capacity reached approximately 3. China's National Energy Administration (NEA) released its 2025 power sector statistics on Jan. China's wind and solar power installed capacity totaled 1,840 GW at. China set records in 2025 with 315 GW of new solar and 119 GW of wind, pushing renewables past fossil fuels in total installed power capacity. This indicates sustained infrastructure upgrades to support renewables growth as the 14th Five Year Plan 2 W, up 16% yoy (see. An aerial drone photo taken on Jshows photovoltaic panels at the site of a desertification control project integrated with wind and solar power facilities in Horqin Right Wing Middle Banner of Hinggan League, north China's Inner Mongolia Autonomous Region. 2025 China Solar Power Generation

H1 2025: China installs more solar than rest of the world combined

Global solar installations are breaking records again in 2025. In H1 2025, the world added 380 gigawatts (GW) of new solar capacity - a staggering 64% jump compared to the same period in

China's Wind, Solar Power Installed Capacity Exceeded 1,800 GW for

Wind and solar power surpassed thermal power in terms of installed capacity for the first time ever in the first quarter of last year. As of March. 31, 2025, China's installed capacity of wind and solar power ...

China Deploys 105 GW New Solar Capacity In 4M 2025

China installed 104.93 GW of solar from January to April 2025, surpassing the 100 GW milestone 2 months earlier than in 2024, when the mark was reached in the first half, according to the latest ...

China's PV Market: 2025 Projections

& Global Solar Leadership

China's PV installations are projected to reach 255 GW by 2025, pushing its cumulative installed capacity to 1,000 GW. This growth is expected to increase solar energy's share of the country's power ...

China's installed power generation capacity up 17.5%

China's cumulative installed power generation capacity had reached 3.72 billion kilowatts by the end of September 2025, marking a year-on-year increase of 17.5 percent, official data showed on Sunday.

China Wind & Solar brief July 2025

In Q1 2025, China's wind and solar capacity surpassed its thermal (coal and gas) capacity for the first time, supplying nearly 23% of the country's total electricity consumed, up from roughly 18% in Q1 of 2024, ...

China power statistics

Put another way, this means that new zero emissions electricity generation in China in the first four months of 2025 more than covered all new electricity

demand growth (which was +3.8% yoy to 3,218TWh, including ...

China Adds Power 8x More Than the US in 2025, with \$500B Energy ...

China added more than 430 gigawatts (GW) of new wind and solar capacity during the year. This pushed combined installed wind and solar capacity beyond 1.8 TW for the first time. Solar and wind now ...

China Adds 315 GW of Solar Capacity in Record-Breaking 2025

China set records in 2025 with 315 GW of new solar and 119 GW of wind, pushing renewables past fossil fuels in total installed power capacity.

China adds 315 GW of solar in 2025 - pv magazine International

China installed a record 315 GW (AC) of new solar capacity in 2025, lifting cumulative installed PV capacity to 1.2

TW and pushing non-fossil power sources past thermal generation for the
