# **Are small solar lights safe for home use**

## Overview

---

Fortunately, when used properly, solar lights are generally considered safe for both indoor and outdoor use. However, there are various safety risks from solar lights. Not only do they enhance the aesthetics of your garden or yard, but they also provide functionality without the added costs of electrical installations. But if you want to reduce your utility costs and your reliance on the grid, swapping out ordinary lights and other appliances for their solar-powered counterparts is one of the simplest. This is extremely rare and solar lights are generally considered safe. The short and simple answer is that while it's extremely rare, the risk isn't zero.
