

KREATYWNY ENERGY POLSKA

Belgrade electricity consumption

Overview

According to data from Elektrodistibucija Srbije (EDS), on Thursday, June 26, electricity consumption reached 83.48 million kilowatt-hours (kWh), which is 15.77 percent higher compared to the same date last year. Pursuant to Article 55, paragraph 5 of the RES law ("Official Gazette of RS", No. The Disclosure regulation prescribes the way. In 2021 Serbia's total energy supply was almost 700 PJ, with the energy mix comprising coal (45%), oil (24%), gas (15%), and renewables (16%). Bioenergy and hydroelectric power were the leading contributors within the renewable energy category, accounting for 67% and 29% of the renewable supply. In Serbia, recent high temperatures have led to increased use of air conditioners and other cooling devices, resulting in higher electricity consumption. Despite this challenge, Belgrade is taking steps to ensure that its energy infrastructure is modern, sustainable, and efficient. Energy is typically specified in Million metric Ton of Oil Equivalent [Mtoe] for large quantities.

Belgrade electricity consumption

belgrade electricity consumption

The residential electrical energy demand was 54% of the total electrical energy consumption in 2014. Utilizing the waste for energy recovery would contribute to energy security in Belgrade, as well as ...

Energy balance of Serbia for 2022

The fourth column shows the electricity consumption, which is a part of the final energy consumption. The main data source for this page are the Eurostat energy balances, edition May 2024.

Energy , Statistical Office of the Republic of Serbia

Energy statistics provides the information on purchase, trade, stocks, transformation and consumption of energy/ energy commodities. All data are harmonized with standards of Eurostat and International ...
