Change lighting to solar power

Overview

If you want to take advantage of the sun's abundant energy to power an outdoor light, you have at least two options. You can hook the light up to a solar-powered battery system, or you can remove the light altogether and replace it with a stand-alone solar. Converting wired lights to solar is an excellent way to reduce energy consumption, lower electricity bills, and make use of a sustainable energy source.) Retrofitting requires careful evaluation and planning, considering factors like weight and EPA, fixture compatibility, solar insolation, and shading.
