# Compensation for photovoltaic panels

**All in one**  
**50-500 Kwh**  
**Hybird**  
**System**

## Overview

---

The Residential Clean Energy Credit equals 30% of the costs of new, qualified clean energy property for your home installed anytime from 2022 through Decem. If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit. Join over 8,000 people who received a free, no obligation quote in the last 30 days. The biggest hurdle for many households is the upfront cost. With the federal solar tax credit ending. Installing solar panels is a big investment, but government incentives for solar panels can significantly reduce the cost. The Disadvantaged Communities - Single-Family Solar Homes (DAC-SASH) program is administered by GRID Alternatives, a nonprofit. Electric utilities in some states have recently changed their policies regarding how they compensate electricity generation from solar photovoltaic (PV) systems installed on residential customers' homes.
