Overview

As of 2026, the average cost of residential solar panels in the U. This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below). NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. The total price depends on your system size, location, roof type. Residential rooftop PV solar panels cost per watt installed has been dropping and newer technology is enabling a far greater efficiency - that's more solar energy converted into electricity for home usage - for less money. Combined with the 30% federal tax credit extended through 2032, most homeowners can achieve payback periods of 6-12 years with 25+. The upfront price for an average-sized residential solar system has fallen from \$40,000 in 2010 to about \$25,000 today. Meanwhile, utility-scale solar now costs between \$24/MWh and \$96/MWh, making it competitive with all other types of energy generation.
