

Damage to the roof caused by photovoltaic panel installation

Overview

The leading causes of roof damage include improper installation that penetrates the roof's waterproof layer, causing leaks and rot. Additionally, poor sealing around mounting points allows water infiltration. Weight stress from panels can also strain older roofs, accelerating wear. Solar panels are a popular choice for homeowners looking to reduce their carbon footprint and save on energy costs. Most homeowners save around \$60,000 over 25 years. Like any home improvement project, using the right service provider is. Below, we'll explore common issues with poorly installed solar panels, why your roof leaks, and what you can do to prevent excessive damage to your home before and after an installation. But before committing to solar, a common concern often arises: will solar panels damage my roof?

The short answer is no, solar panels generally do not. Understanding the potential for roof damage is essential for several reasons: **Financial Investment:** Solar panels represent a substantial financial commitment. Homeowners want to ensure they are making a sound investment.
