Overview

Distributed Generation (DG) refers to small-scale electricity production close to the point of use. Solar DG includes residential, commercial, community solar, and hybrid systems. Sandia is a multiprogram laboratory operated by Sandia Corporation, a Lockheed Martin Company, for the United States Department of Energy's National Nuclear Security Administration under Contract DE-AC04-94AL85000. Approved for public release; further dissemination unlimited. Issued by Sandia. The American Public Power Association represents not-for-profit, community-owned electric utilities that power homes, businesses and streets in nearly 2,000 towns and cities, serving 48 million Americans. Whether you're a homeowner, a small business, or just exploring clean energy, we're here to help you understand your options, responsibilities, and next steps. This novel framework enhances energy efficiency, reduces transmission losses, and facilitates the seamless integration of renewable resources.
