

Double glass component hook type

Overview

A glass spider fitting is a high-strength architectural hardware component designed to support and secure large glass panels in frameless glass structures. Command Outdoor adhesive holds strongly through rain, snow, and extreme temperatures on smooth, finished surfaces, and these string light clips remove cleanly→ with no. Our glass hook system connects single & double glass panels to the structure for a minimal appearance point support system. Hook System is suitable for 1/2" to 1-1/16"+ glass thicknesses. This system has been developed for a quick & easy installation which greatly decreases field labor costs. Most glass applications demand a special type of frame or fitting. By connecting the different hinge types with lock-lever combinations or handle bars, individual solutions can be realized, even for. oles in the glass.
