Overview

All data relevant to the reported results in this report can be found in the NREL Data Catalog. 2 Figure ES-1 (page vi) compares our Q1 2021 PV-only benchmarking results to the Q1 2020 National Renewable Energy Laboratory benchmarking analyses. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. Solar Photovoltaic. DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to accelerate their development and deployment The U. We use a bottom-up method, accounting for all system and project development costs incurred during installation to model the costs for residential, commercial, and. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems.
