

Energy Storage Tax Code Query System

Overview

This guide breaks down the latest tax code changes impacting projects beginning in 2025 and beyond, including Section 48E, prevailing wage and apprenticeship rules, safe harbor strategies, and new PFE requirements. Battery energy storage systems (BESS) are often referred to as the game changer when it comes to delivering clean energy. Since 2005, the emergence of renewable energy resources like solar and wind has increased the intermittency of energy on the grid and the need for a resource to stabilize. As federal incentives for solar and energy storage continue to evolve, staying compliant has never been more critical or more complex. You can't claim residential. How can a tax-exempt entity use these Investment Tax Credits (ITC)?

Eligible tax-exempt and governmental entities can claim the § 48 ITC and § 48E Clean Electricity ITC for qualified energy property through a new mechanism called elective pay (also known as “direct pay”). This is an emissions-based incentive that is neutral and flexible between clean electricity technologies.
