Overview

Let's unpack why this Solomon Islands capital became the energy storage case study that's making global engineers sit up straighter than a palm tree in still weather. Honiara faces energy challenges that'd make even Siri stutter: 75% of electricity still comes from diesel generators. Welcome to Honiara, where energy storage isn't just tech jargon – it's the difference between keeping lights on during monsoon seasons and playing board games by candlelight. Climate change will act to amplify many of these human stresses into the future. In response, a new project 'Climate Resilient Honiara' (CRH), funded by the UNFCCC Adaptation Fund. Imagine a tropical paradise where diesel generators once roared day and night. This project isn't just about panels and inverters – it's rewriting the rules of energy indepen. Well, the newly operational Honiara Energy Storage Power Plant isn't just another infrastructure project – it's rewriting the rules of energy resilience for small island states.
