# **Energy storage investment trends people s republic of china**

## Overview

---

China has a goal to install 180 gigawatts of battery energy storage systems by the end of 2027, with a direct project investment of \$35.8 billion, 40% of the global total. It is currently the largest single electrochemical storage facility in the country (Image: Ma Mingyan / China News Service / Alamy) In February 2025, China shelved a requirement that new domestic. The China energy storage market is experiencing rapid growth driven by government initiatives promoting renewable energy integration and energy efficiency.
