Overview

This design not only enhances the stadium's appearance but also contributes to its sustainability by partially powering its operations and reducing carbon emissions, according to LONGi. The company estimates that over the next 25 years, the system will reduce carbon emissions by 4,930. Olympics was an important principle for the Beijing 2022 Winter Olympics, which set environmental requirements in terms of venue facilities, technical support and energy use. © BOCOG - The Water Cube/Ice Cube public skating rink. Specific to Beijing 2022, the Carbon Management. From the fierce clashes of Olympic ice hockey to the roar of basketball fans and the graceful arcs of figure skating, Beijing's National Indoor Stadium has become a model for sustainable Olympic venue use. This stadium's solar system, comprising 351 kilowatts of photovoltaic modules, was supplied by LONGi Green Energy Technology, a Chinese solar.
