# **Flywheel energy storage distribution at Windhoek solar container communication station**

## Overview

---

As the sun dips below the Kalahari dunes each evening, this lithium-ion and flow battery hybrid system kicks into gear, storing enough daytime solar energy to power 90,000 homes through the night [1]. This isn't your grandma's AA battery setup. Flywheel energy storage system is an energy storage device that converts mechanical energy into electrical energy, breaking. towards renewables is central to net-zero emissions. Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide. North America leads with 40% market. Flywheel energy storage systems have gained increased popularity as a method of environmentally friendly energy storage.
