

# German energy storage distribution station

## Overview

---

Germany is set to host Europe's largest battery energy storage project, with a new grid-scale facility planned for the Lusatia region. The project is being developed by Fluence Energy, a U. -based energy storage technology provider, and will be transferred to LEAG Clean. Energy storage systems are an integral part of Germany's Energiewende ("Energy Transition") project. While the demand for energy storage is growing across Europe, Germany remains the European lead target market and the first choice for companies seeking to enter this fast-developing industry. The. The first of its kind, this study offers an overview of the photovoltaics and battery storage market in Germany. It also includes plants in Austria, Denmark.
