Homemade Electric Solar Generator Set

Overview

Building a weatherproof DIY solar generator involves mounting and wiring a battery, charge controller, inverter, trickle charger, and fusing inside a weatherproof case. Then all the relevant input and output sockets are wired and mounted on the outside of the case where they are. Portable, weatherproof, and ready-to-rock — a homemade solar generator can meet all your power needs in and around your boat, camper, or cabin. You don't need to be an expert to build one. With a few tools and some basic knowledge, you can create a reliable source of energy. The panel collects sunlight, the charge controller manages the flow of power to the battery, and the inverter turns that stored power into electricity you can actually use.

Homemade Electric Solar Generator Set

How to DIY a Solar Power Generator : 6 Steps

How to DIY a Solar Power Generator: In this Instructable, you'll learn how to build your own DIY solar power generator using basic components like a solar panel, battery, inverter, and charge controller. ...
