

# Household solar power generation is reliable

## Overview

---

Solar panels have emerged as one of the most reliable energy technologies available today, with modern systems routinely delivering consistent performance for 25-30 years. Solar projects are making it easier for Americans to choose solar energy to power their homes. Household solar power generation is no longer a futuristic concept reserved for environmentally conscious pioneers. Leading manufacturers guarantee at least 85% power output even after a quarter-century of operation - a testament to their. Solar Technology Has Reached Peak Efficiency: Modern monocrystalline panels achieve 20-24% efficiency rates in 2025, with the average residential system size now at 11kW, producing 12,000-16,000 kWh annually - enough to power most homes completely.
