# **How long can residential solar power generation last**

## Overview

---

Residential solar panels typically last 25-30 years, though efficiency gradually declines with age. Age, light exposure, and backsheet failure contribute to power reduction over time. Regular cleaning, annual inspections, and storm checks help maintain performance and delay. If you're counting on solar to deliver long-term savings, it pays to understand what "lasting 25 years" actually means, and what you can do to make every one of those years count. 25% degradation rates cost 10-20% more upfront, they produce 11. Proper care. Solar panels are built to last, but just how long can you expect them to keep powering your home?

The average lifespan of a solar panel is 25-30 years, meaning your investment in clean energy will pay dividends for decades. While factors like climate, maintenance, and manufacturing quality can.
