

How long does a 1kva uninterruptible power supply last

Overview

At 80% load a typical 1kVA/1kW UPS can provide 5-10 minutes of battery runtime. This can be extended by adding plug-in battery packs if the UPS has this facility or oversizing the uninterruptible power supply. UPS units are rated by volt-amps and watts, which is a power limit and a rough estimate of how long the battery will last. A 350-VA unit costs about \$50 and should power a router for almost two. Calculate how long your uninterruptible power supply (UPS) will provide backup power based on its VA rating and your equipment's power consumption. Several factors influence UPS lifespan, and it's essential to understand that there are two key elements to consider: 1.
