Made with chemicals safer for human health and the environment. DOKIO 400W 31V Mono Solar. Premium Technology Justifies Higher Costs: While SolarEdge systems cost 20-35% more than basic string inverters (\$5,500-\$9,000 vs \$3,000-\$5,000 for residential installations), the module-level optimization delivers 15-25% higher energy production, typically paying for the premium within 2-3 years. A solar inverter costs \$1,500 to \$3,000 total on average for a medium-sized solar-panel system installation. String inverter systems cost less up front, but systems using microinverters last. Solar inverters convert DC solar power into usable household AC power. This type of inverter produces a smooth, continuous waveform, which is compatible with sensitive electronic devices.
