

How much does a solar-storage inverter cost

Overview

SolarEdge inverter costs in 2025 range from \$1,367 for basic residential models to over \$6,500 for commercial systems, but the total system investment including optimizers and installation typically runs \$5,500-\$9,000 for residential applications. Premium Technology Justifies Higher Costs: While SolarEdge systems cost 20-35% more than basic string inverters (\$5,500-\$9,000 vs \$3,000-\$5,000 for residential installations), the module-level optimization delivers 15-25% higher energy production, typically paying for the premium within 2-3 years. A solar inverter costs \$1,500 to \$3,000 total on average for a medium-sized solar-panel system installation. Solar inverter prices depend on the size and whether it's a string inverter, microinverter, or hybrid model. Three of the most popular options for. Inverter upgrades: Hybrid or replacement inverters may add \$1,000-\$3,000. EV charger integration: Adding a Level 2 charger can cost \$1,000-\$2,000 more but enhances. The size of your solar system (measured in kilowatts, or kW) directly impacts the size—and, therefore, the cost—of your inverter. Think of it like this: a small apartment needs a smaller AC unit than a large house. The same principle applies here.
