

How to install five photovoltaic panels horizontally

Overview

This DIY solar panel installation guide provides an overview of the requirements and steps necessary to successfully bring your solar project to fruition. From planning and permitting to interconnection and maintenance, we will walk you through every aspect of the installation process. I plan in installing 12x Longi LR66-495M modules horizontally. Should the rails run perpendicular to the modules?

If perpendicular, should the rails align with the inner. In residential and commercial photovoltaic projects, the orientation of PV modules is far more than a simple installation choice — it affects system efficiency, drainage performance, aesthetics, and maintenance requirements. Horizontal means that the long side of the solar module is parallel to the east-west direction, while vertical means that the short side is parallel to the east-west direction.
