How to install the photovoltaic panel lifter

Overview

In this video, I show you a simple, safe, and effective method to get your solar panels up without damaging them or risking injury. The Fluke Module Lift™ is designed to safely and quickly transport a PV module to a roof, streamlining the installation process of solar panels. With. Introduction to the Solmetric Module Lift. The. To lift solar panels onto your roof, you can use a ladder railing system, a pulley system, a lifting bag, or even DIY lifting systems using a pulley. Carrying them up the ladder can also be done with products like the solar panel caddy, and all of these ideas will make this task that much easier. Fortunately, there are a number of options available for DIY installers to make the job easier, especially if you're working with a solar panel pulley system. The pulley system can reduce the amount of manual lifting required, and products like the solar panel caddy can make it even easier to carry. Using a gravity-based locking mechanism, with the extra assurance of a safety block for accidental disengagement, you'll clamp the caddy around the frame of the solar panel in landscape orientation with the cell side facing away from you.

How to install the photovoltaic panel lifter

Solmetric Module Lift Instructions

The Solmetric Module Lift is designed to help you safely and quickly transport a solar PV module on to a roof. The system uses your existing Werner or Louisville fiberglass extension ladder.

How To Lift Solar Panels Onto Roof

Let's look at the best ways to lift your solar panels onto the roof to avoid potential damage to the panels and your roof during the installation and prevent injury to yourself!
