## Overview

---

Do solar panels actually work when it's cold and snowy?

Short answer: yes. Longer answer: well-designed solar systems are built to handle winter weather, and in many cases, they bounce back faster than people expect. If you live in a snowy area and have solar panels—or you're thinking about installing them, you've probably wondered the same thing every winter: Do I need to remove snow from my solar panels?

And if so, what's the easiest way to do it?

The short answer: In most cases, you don't need to do anything. [How to Protect Solar Panels from Snow and Ice?](#)
