Is it good to install photovoltaic panels at the bottom of the building

**LPW48V100H
48.0V or 51.2V**

Overview

Ground mount solar installations offer several advantages. For starters, they're easier to install and maintain since they're accessible at ground level. To install solar energy at the bottom of a multi-story building, a systematic approach is essential. Proper placement and installation of photovoltaic panels affect not only the amount of energy produced but also installation costs, maintenance, and the system's lifespan. Rooftops are the most common places you'll see solar panels, but you have other options too. Why is it such a common practice?

I can think of two reasons.
