Is it safe to install solar panels on rooftops

Overview

When installed correctly, solar panels do not damage roofs. In fact, they can provide added protection from UV rays, hail, and extreme weather. Since the roof is one of the most critical parts of the home, it's natural to want reassurance. It's important to consider the pros and cons of solar panels on your roof before you decide if a solar panel installation is right for you. Solar panels offer a compelling mix of environmental benefits and financial incentives. As you're considering making the switch to solar, you may wonder, “Is it safe to have solar panels on my roof?

” The answer here is almost always yes; however, the following safety considerations should be reviewed to determine the condition of your roof before moving forward. Professional installers ensure they're securely mounted, using roof-friendly methods to avoid leaks or structural issues.
