NASSAU, BAHAMAS — The technology group Wärtsilä will supply a 25MW / 27MWh advanced energy storage system for Bahamas Power and Light Company (BPL) to meet The Bahamas' spinning reserve requirements and significantly improve generation efficiency and system reliability for the island's grid. In. Bahamas Power and Light (BPL) has announced significant plans to develop large-scale solar power projects integrated with battery storage, a move set to enhance energy reliability across the islands. This article explores the project's significance, technical specifications, and its potential to transform the Caribbean's energy landscape. Large photovoltaic (PV) solar arrays will capture the energy from the sun and send it to our country's electricity grid.
