Longji Solar Photovoltaic Power Generation

Overview

It is understood that as the largest building photovoltaic integrated photovoltaic power generation project in Northwest China, the project has a total installed capacity of 34 MW and a total investment of about 145 million yuan, which can provide 35600 MW of clean electricity. It is understood that as the largest building photovoltaic integrated photovoltaic power generation project in Northwest China, the project has a total installed capacity of 34 MW and a total investment of about 145 million yuan, which can provide 35600 MW of clean electricity. At the key node of intergenerational transition of global Photovoltaic (PV) technology, the back contact (BC) cell technology is leading the new-generation PV technology paradigm revolution, becoming the core engine to drive industry cost reduction and efficiency improvement and realize energy. On a mission to accelerate the adoption of sustainable energy solutions, US\$30 billion Chinese tech firm Longi is not just selling solar - but using it Longi Solar is on a mission - to accelerate the adoption of sustainable energy solutions to address the pressing challenges of climate change and. As the largest solar technology company in the world, Longji Green Energy (share price: 45.9 billion yuan) is a typical technology-driven company. It has always adhered to the principle of "not leading or expanding production", achieved breakthroughs in battery efficiency. LONGi Green Energy Technology Co. (hereinafter referred to as "LONGi"), a China-based solar technology company, recently published a research paper titled Perovskite-silicon tandem solar cells with bilayer interface passivation online in the journal Nature as the first corresponding author. In a landmark achievement for sustainable manufacturing, LONGi's Jiaying Production Base has become the world's first facility in the photovoltaic (PV) industry to earn dual recognition as both a Lighthouse Factory and a Zero-Carbon Factory. The milestone was celebrated during Shanghai Climate. On December 27, the 34 MW photovoltaic power generation project of Longji Green Energy Industrial Park, the largest building photovoltaic integrated photovoltaic power generation project in Northwest China, was officially connected to the grid in Jinghe New Town, Xixian New District, Shaanxi.

Longji Solar Photovoltaic Power Generation

How Longi became the world's leading solar tech manufacturer

Founded in 2000 by CEO Li Zhengu, Longi has steadily grown over two decades to become the world's leading supplier of solar PV products and solutions, with one of every four solar ...

Longi: The world's largest photovoltaic cell production base with the

On September 28, the high-efficiency single crystal battery project of Jinghe New Town, Longji Lvneng Xixian New Area, was officially put into production, which is also the largest single ...

The World's Leading Supplier of Solar PV Solutions

LONGi's technological and manufacturing leadership in solar wafers, cells and modules underscores our commitment to helping accelerate the clean energy transition. By offering high-quality, reliable ...

LONGi's research progress in silicon-

perovskite tandem solar cells

LONGi Green Energy Technology Co., Ltd. (hereinafter referred to as "LONGi"), a China-based solar technology company, recently published a research paper titled Perovskite-silicon tandem

2MW / 5MWh
Customizable

LONGi Sets Global Benchmark with First Zero-Carbon PV Lighthouse

With its unwavering commitment to innovation, LONGi continues to solidify its role as a global leader in solar technology --driving not just the renewable energy revolution, but a fundamental shift in how ...

How Longi became the world's leading solar tech ...

Founded in 2000 by CEO Li Zhenguo, Longi has steadily grown ...

Longi: 2020 is the Best Time for BIPV to Take Off

Longji announced that in the second half of 2020, the company will join the BIPV market army and is expected to launch

new BIPV products and solutions, which will further promote the rapid ...

Northwest is the biggest! Longji Building Photovoltaic Integrated

On December 27, the 34 MW photovoltaic power generation project of Longji Green Energy Industrial Park, the largest building photovoltaic integrated photovoltaic power generation project in Northwest ...

LONGi Solar Panels & PV Modules

Backed by advanced technologies, LONGi solar panels feature excellent power ratings and top conversion efficiencies, and can be used across all market segments. LONGi's field-proven bifacial ...
