Overview

Energy storage developer esVolta has completed and brought online a portfolio of three utility-scale battery storage projects in Texas, totaling 490 MW of power and 980 MWh of energy capacity. The projects became operational ahead of the summer peak demand season on the state's ERCOT.

- Addition of 5 GW of energy storage in one year helped Texas avoid conservation notices
- \$750 million in energy cost reductions in the Summer of 2024

WASHINGTON DC, Decem— The American Clean Power Association (ACP) today released an analysis highlighting how recent significant.

Revolution battery storage project in Crane County, Texas, is a large-scale battery energy storage facility developed, owned and operated by Spearmint Energy, designed to provide grid stability and support the integration of renewable energy sources in the region. As we lean more on wind and solar—and since our grid doesn't connect to the rest of the country—batteries help keep the power flowing when the weather turns wild or the sun goes down. 5, 2026 /PRNewswire/ -- Canadian Solar Inc.
