

# Notes on transporting photovoltaic panels

**TAX FREE**

## Product Model

HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

## Dimensions

1600\*1280\*2200mm  
1600\*1200\*2000mm

## Rated Battery Capacity

215KWH/115KWH

## Battery Cooling Method

Air Cooled/Liquid Cooled

## Overview

---

Snippet paragraph: Safely transporting solar panels needs careful planning, strong packaging, and secure loading. Control temperature and humidity in transit. Proper. Packed Pallet on a Pallet: According to the panel dimensions. Unfortunately, the protocol for transporting PV modules that would become a standard for everybody hasn't been developed yet. Solar industry is still young, and panels from manufacturers around the world are all different. Modern solar panels are generally constructed as glass-covered photovoltaic arrays, designed to withstand decades of outdoor weather while converting sunlight into electricity. This robust external appearance can be misleading, as the delicate silicon cells beneath the glass are highly susceptible. This guide shares my experience to help you transport panels safely, save money, and avoid headaches.

### Transporting Solar Panels: An Expert Approach

To ensure safe transit of solar panels and related equipment, here are some essential tips to remember and what to look for in a partner.

### How to Transport Solar Panels Safely

Master the logistics of moving solar panels. Essential steps for vertical handling, strategic padding, and securing loads to avoid invisible cell damage.

## Solar Panel Delivery Guide: Shipping Solar Panels Got Easier

Discover safe solar panel delivery methods for distributors, manufacturers, and contractors. Ensure satisfaction, reduce losses, and protect your brand.

## How to Protect Solar Panels from Damage Transporting

Pressure Causes Microcracks in Panels  
 Transporting Solar Panels Is A Delicate Process  
 Prepare For The Pickup Ahead  
 When Carrying A Panel, Don't Apply Pressure  
 So what do manufacturers do to ship panels without damaging them? Usually, to transport solar panels, a pallet is used. Here is how a good company packs it:

- o First panels go on the pallet bottoms up and the last one is placed front side up.
- o Corner protectors and foam pads across the frame are added.
- o Usually a piece of cardboard or plastic is placed on top.
