Photovoltaic panel assembly grounding specification atlas

Overview

This Solar America Board for Codes and Standards (Solar ABCs) report addresses the requirements for electrical grounding of photovoltaic (PV) systems in the United States. Initiated by Solar Foundations USA®, Inc. The project drawings are unique to each job site and are based on client specifications. It may supersede this installation manual. Solar ABCs, with support from the U.S. Department of Energy, commissioned this report to provide the PV industry with practical. This Engineering Design Guide was created to help our engineering partners more easily design and specify PV mounting applications using IronRidge components. The Atlas-1 dramatically lowers overall project installation time and racking costs as well as providing a UL 467 grounding mid clamp. A clear, brush-free area of 10 feet (3048 mm) shall be.
