Private individuals can run solar power generation

51.2V 150AH, 7.68KWH

Overview

The good news is that you have a legal right to make energy from the sun without unreasonable interference from the utility or the government. A 2015 scholarly article published in the Energy Law Journal outlines these legal rights in detail. My question is can this be done by an individual?

Is it economically viable?

Please let me know if there's more reading I can do on this as I like to. Individuals, small businesses, large companies, and municipalities can all choose to build and operate privately owned energy systems that connect to our Evergy grid. Examples include: All of these are examples of “Distributed Energy Resources,” or DERs for short: non-utility energy systems or. The global distributed solar market is projected to grow at a 7. 8% CAGR through 2030, and guess who's leading the charge?
