Solar One-to-Two Home System

Overview

Yes, you can share a solar system between two or more houses, but there are key considerations. 3 phase inverter and Fronius smart meter. Is there any way to use same PV. Harness the sun's power and slash your energy bills by installing solar panels on your two-family home. With rising electricity costs and an aging grid, it's time for a reliable solution that gives you the power to use energy on your own terms.

Solar One-to-Two Home System

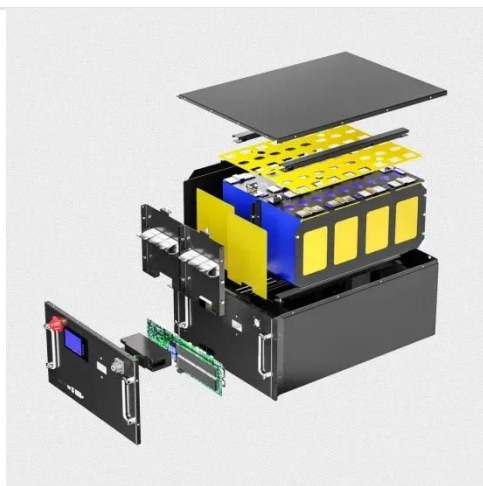

Advice on two systems to be tied together

Each solar system would have its own inverter (s), batteries and PV. But for several reasons, I'd like them to share Solar and battery resources with each other, and do away with one of ...
