

Solar panel industry expands production

DISTRIBUTED PV GENERATION + ESS

Overview

After years of relying heavily on imported solar panels and their components, U.S. domestic solar module production capacity is finally on the up. 5 gigawatts direct current (GW dc) of capacity in Q2 2025, a 24% decline from Q2 2024 and a 28% decrease since Q1 2025. Solar accounted for 56% of all new electricity-generating capacity added to the US grid in the first half of 2025, with a total of 18 GW. Electricity generation by the U.S. In our latest Short-Term Energy Outlook (STEO), we expect U.S. The Global PV Deployment • In 2024, between 554 GW dc and 602 GW dc of PV were added globally, bringing the cumulative installed capacity to 2. The rest of the world was up 11% y/y. • The IEA. The solar industry is not just about clean energy – it is an economic powerhouse that drives investment, job creation, and technological innovation across the U.S. With over \$70 billion in private investment flowing into the sector and more than 280,000 Americans employed in solar-related jobs, the U.S. solar manufacturing sector enters 2026 in a transitional phase, balancing significant domestic production growth with complex regulatory challenges. While the nation has successfully reshored the entire supply chain—from polysilicon to solar module assembly—for the first time in U.S. history. Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

Solar panel industry expands production

Solar Industry: A Driving Force for Economic Growth, Job Creation

This growth extends beyond just solar panels; the industry supports a robust supply chain that includes storage solutions, mounting systems, power electronics, and other key components.

...

The Manufacturing Of Solar Panels In The US Is Soaring Thanks To ...

Solar module manufacturing capacity in the United States now exceeds 31 gigawatts (GW) -- a nearly four-fold increase since the Inflation Reduction Act became law, the report says. In ...

Solar power generation drives electricity generation growth over the

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

US Solar Manufacturing Expands

Amid Supply Chain Bottlenecks

The United States solar manufacturing sector enters 2026 in a transitional phase, balancing significant domestic production growth with complex regulatory challenges. While the nation has ...

Solar Industry Research Data - SEIA

Solar energy in the United States is booming. Along with our partners at Wood Mackenzie Power & Renewables, SEIA tracks trends and trajectories in the solar industry that demonstrate the diverse ...

Solar Market Insight Report Q3 2025

In the second quarter, this industry continued to expand with module manufacturing capacity growing to 55.4 GW - more than annual solar installations when these factories are running ...

Spring 2025 Solar Industry Update

They produce 60,000 metric tons per year in Germany, though not all their capacity goes toward polysilicon for solar purposes, and they plan to shift more of

their production toward use in ...

Quarterly Solar Industry Update

In the first half of 2024, the United States produced 4.2 GW of PV modules--an increase of 75%, y/y--roughly evenly split between thin-film and crystalline silicon (c-Si) module technology.

Executive summary - Solar PV Global Supply Chains

The world will almost completely rely on China for the supply of key building blocks for solar panel production through 2025. Based on manufacturing capacity under construction, China's share of ...

U.S. Solar Manufacturing Industry Hits Historic Milestone

After years of relying heavily on imported solar panels and their components, U.S. domestic solar module production capacity is finally on the up.

Thanks to major policy shifts and ...

Our Lifepo4 batteries can be connected in parallels and in series for larger capacity and voltage.
