## Overview

---

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. Welcome to Global Solar Atlas v2. Start exploring solar potential by clicking on the map. Calculate energy production for selected sites. You can find more about Ember's methodology in this. The Global Solar Atlas (GSA) is a free, online, map-based application that provides information on solar resource and photovoltaic power potential globally. Each country displays color-coded indicators showing how many downloadable maps are available for that location. 6% in 2027, when it reaches an annual total of 4,423 BkWh.

### Global Solar Atlas

The Global Solar Atlas is provided by the Energy Sector Management Assistance Program (ESMAP), a multi-donor trust funded program administered by the World Bank, and was developed under contract by Solargis, a provider of solar resource data and photovoltaic (PV) energy evaluation services. The GSA provides an interactive map of solar resource and photovoltaic power potential and a variety of other environmental data relevant for understanding the practical and technical potential of solar power...
