[Photo: Ghaith Alsayed/AP Photo] Abdulrazak al-Jenan swept the dust off his solar panel on his apartment roof overlooking Damascus. Syria's largest city was mostly pitch-black, the few. This geographic advantage makes solar energy a highly suitable solution for the country's ongoing power problems. Solar energy offers several key benefits: Availability: The sun shines almost year-round in Syria, especially in arid and semi-arid regions. 5 kilowatt-hours per square meter daily, Syria holds immense potential to become a regional leader in renewable energy. For years, the country has struggled with intermittent electricity supply, primarily due to the devastating effects of a prolonged civil war and crippling international sanctions.
