## Overview

---

This document is based on the provisions set out in the 2025-2026 Edition of the ICAO Technical Instructions for the Safe Transport of Dangerous Goods by Air (Technical Instructions) and the 67th Edition (2026) of the IATA Dangerous Goods Regulations (DGR). follow all applicable federal requirements and A agency-specific policies and procedures All procurements must be thoroughly reviewed by agency contracting and legal staff and should be modified to address each agency's unique acquisition process, agency-specific authorities, and project-specific. Technology that stores electrical energy in a reversible chemical reaction Lithium-ion (li-ion) batteries are the most common technology for energy storage applications due to their performance characteristics and cost. The decrease in the battery's maximum capacity over time and through use. The.
