

# **Total solar power generation in 2025**

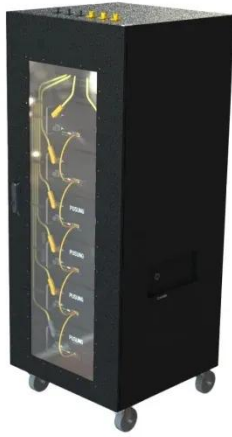

## Overview

---

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Electricity generation by the U. In our latest Short-Term Energy Outlook (STEO), we expect U. 6% in 2027, when it reaches an annual total of 4,423 BkWh. 3 terawatts of utility-scale capacity by fuel, region, and ownership. The largest fuel source is natural gas, accounting for just under 43% of. Half of America's new power generation this year could come from solar photovoltaic installations, marking a shift in the nation's energy infrastructure.

## Total solar power generation in 2025

---

### Global Market Outlook for Solar Power 2025-2029

In our most realistic scenario, we anticipate a 10% increase in installations to 655 GW in 2025, with annual growth rates remaining in the low double digits between 2027-2029, reaching 930 ...

---

### Solar electricity to dominate half of US power in 2025

Solar electricity is poised to dominate America's energy expansion in 2025, with developers planning to add 33 gigawatts (GW) of solar photovoltaic capacity - representing more ...

---

### Solar Market Insight Report Q3 2025

Solar accounted for 56% of all new electricity-generating capacity added to the US grid in the first half of 2025, with a total of 18 GW installed. Combined, solar and storage accounted for 82% ...

---

### America's Electricity Generation Capacity, 2025 Update

Public power utilities procure most of their wind and solar energy supply through power purchase agreements (usually with non-utility generators) rather than direct ownership.

## Renewable Capacity Highlights 2025

Solar, in line with the previous year, accounted for the largest share of the global total, with a capacity of 1 865 GW. Renewable hydropower<sup>1</sup> and wind energy accounted for most of the remainder, with total ...

## Global solar generation up 31% year-on-year

The world generated 2,109.76TWh of electricity from solar in the first nine months of the year, a 31% increase over the same period in 2025.

## Global solar installations surge 64% in first half of 2025

Global solar installations are on track for another record year. In the first six months of 2025, the world added 380

GW of new solar capacity -- 64% higher than during the same period in ...

## Renewable electricity - Renewables 2025 - Analysis

Growth in utility-scale and distributed solar PV more than doubles, representing nearly 80% of worldwide renewable electricity capacity expansion. Low module costs, relatively efficient permitting processes ...

## Solar power generation drives electricity generation growth over the

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027.

## Electricity generation from U.S. solar grows 28% year-over-year

Utility-scale solar capacity reached 128.6

GW in March 2025, growing from 96.9 GW in March 2024, while small-scale solar, projects of 1 MW or less, reached 55.7 GW in March 2025, ...
