Traditional Uninterruptible Power Supply

Overview

An uninterruptible power supply (UPS) is a device that kicks in with backup power the second your main power source fails. Unlike a generator, there's no waiting—it just takes over, so computers, servers, and other gear keep humming along. A UPS differs from an auxiliary or emergency power system or standby generator in that it will provide. Dive into the essential aspects of Uninterruptible Power Supplies (UPS) to ensure you safeguard what truly matters when it counts the most. : Electronics New customer?
