## Overview

---

The main objective of this systematic review is to identify the present status of solar energy utilization and development in Ethiopia and any possible challenges that may hinder its' utilization and development. Regarding the methodology of the study, a systematic review was conducted in Addis Ababa, Aug(ENA) -- Ethiopia is uniquely positioned to leverage solar energy not only to meet domestic needs but also to become energy hub, State Minister of Water and Energy Sultan Welle said. Ethiopia and International Solar Alliance (ISA) have signed Solar Mini-Grid and Solar. According to the researches, Ethiopia is blessed with an abundance of sunlight, receiving an average of 5.5 kWh/m<sup>2</sup>/day throughout the year, This vast solar potential, coupled with declining costs of solar technology, provides a significant opportunity for the country to harness clean energy. However, despite all its available potential, the country's energy sector especially solar energy is still in its infancy stage.
