

Overview

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the sector, with global solar installations set to rise to 914 Gigawatts (Gw) in 2030, 57% above 2024 levels. Solar accounted for 81% of all new renewable energy capacity added worldwide. While remaining a modest contributor to overall electricity generation for now, solar's. The future of solar energy is set for exceptional growth as advancements in technology, increased investments, and strong policy support continue to push the industry forward. Backed by influential investors and a growing startup ecosystem, the solar sector continues to adapt strategically to economic pressures. Wind and solar investments in the first half of 2025 fell 18%, to nearly US\$35 billion (prior to the enactment of this act), compared to the same period in 2024.

What are the prospects for solar power companies

2026 Renewable Energy Industry Outlook , Deloitte Insights
