## Overview

---

Brazil's new 2025 energy storage regulations create urgent opportunities for businesses to pair solar with lithium batteries. Here's why: Overloaded grids cause interconnection delays for DG systems. Batteries enable off-grid operation during peak. There has been a surge in the introduction of wind and solar power, especially small-scale, distributed generation projects, mainly solar photovoltaic, which reached an installed capacity of 37GW in 2025. More than a diagnosis, it offers a roadmap of opportunities and recommendations to accelerate the integration of storage technologies, strengthening reliability, reducing costs, and addressing the challenges for the Brazilian power sector. GoodStorage is a specialized service provider offering intelligent urban storage solutions that enhance efficiency and quality of life. While 2025 growth is projected to be modest (19.2 GW), the long-term outlook remains robust, with conservative estimates pointing to 90 GW and beyond. The country's renewable boom is hitting a brick wall, and energy storage cabinets might just be the bulldozer we need. Major cities like São Paulo experienced 32 hours of brownouts last summer during peak demand [2]. SHANGHAI, J/PRNewswire/ -- Huawei Digital.
